Skills

Hard ones:

Data analysis processes

Statistical analysis & modelisation

Critical & logical thinking

Planning

Soft ones:

Teamwork & relational

Autonomy

Languages

French: mother tongue

English: fluent

Italian: intermediate

Spanish: intermediate

Malagasy: iintermediate

Profile

As a student training to become a data scientist, I am seeking a work-study placement in a company that prioritizes human values. This opportunity will allow me to apply my current and future training through practical experience. Passionate and intellectually curious about demystifying technologies and innovations, I'm always ready to take on new challenges.

Education & certifications

● **Bootcamps: Python, PSQL, Bash, Jupyter**

FreeCodeCamp.org

2025

● **Bachelor's in Economics**

Panthéon-Sorbonne U: Sorbonne School of Economics
2022

● **High school Diploma, ES series**

Lycée Français de Tananarive, Madagascar
2016 (highest honors)

Work experience

● **Qualitative Data Analyst/Annotator: (senior)**

Qualitative analysis of AI output data from various types of inputs on different platforms, with each having its respective way of analysis.

- identification, verification and correction of various data biases/errors within qualitative guidelines and time constraints.
- respect of a strict analysis framework, while integrating decision-making for special cases.

Projects

● **Nvidia, leading a promising technology or a bubble ?**

Answer key problematic by collecting, aggregating & analysing available public data.

- tools: PostgreSQL & bash scripting, Python with some libraries & Jupyter notebook.
- shaping the narrative after the data has been manipulated, visualized, and analyzed.

● **Custom Utility Bill Calculator:**

Automatic calculation of individual electricity & water consumption prices using respective meter indexes

- simple GUI design for non-technical users as frontend with a python script backend.
- improved efficiency and transparency between renters and owners.
